mild[®]

About *mild*[®]

mild is a safe, outpatient procedure that relieves pressure in your spinal canal by removing excess ligament tissue.

- No implants
- No general anesthesia
- No stitches
- Resume light activities within a few days
- Covered by Medicare nationwide

Quick, outpatient procedure using an incision the size of a baby aspirin

Long-Term Results With Extremely Low Complication Risk

Proven to be as **safe** as an injection¹

Over **20,000** patients treated to date

Clinical data has shown a **7X** increase in standing time and a **16X** increase in walking distance²
